1 1/16" x 3 5/8"
- **Closet Pole (LTIM 232)**
1 3/8"

Why is Timbron the right solution for you?

Timbron Premium Interior Mouldings combine beauty with the convenience of low maintenance. Our products are designed to rigid specifications for reliable long lasting quality, durability and performance.

Timbron's proprietary process extrudes a product that has the same density as a soft wood. Its hardened exterior skin can be left its nice white color or painted. You can cut, nail, glue, sand and paint it – Works like Wood.

Timbron mouldings are an ideal solution for the high moisture interior areas of your home (kitchens, bathrooms, laundry rooms, and entryways), where its durability and waterproof properties produce beautiful and long lasting results.

Why is Timbron the right product for the environment?

Timbron is composed of 90% recycled plastics (75% post consumer, 15% pre consumer), mainly polystyrene. This is a popular shipping material that is not biodegradable and occupies tremendous volumes of space in our landfills. We take this discarded polystyrene, recycle it, and produce Timbron premium interior mouldings. Timbron mouldings are also low emitting, improving indoor air quality.

We are proud to state that Timbron has recycled enough polystyrene to completely fill the Empire State Building - over 37

Printed on recycled paper with soy-based ink

Products with a Purpose...

Saw it by Hand

Cuts and copes with precision.

Saw it with power

Cutting Tips:

- For power saws, use a 7.5" blade with 24 - 40 teeth, or a 10" blade with 60 - 90 teeth.
- Make a quick cut for precision.

Nail It

Nailing Tip:

- Hand nail with #3 or #4 bright finish nails.

Shoot It

Nailing Tips:

- With a nail gun, use 16 or 18 gauge finishing brads. Set pressure between 70 and 90 PSI.

Glue It

Gluing Tip: Use any non-solvent based glue.

Caulk It

Caulking Tips:

Use a flexible latex based caulk

We suggest products such as DAP:

Elastopatch™, Dynaflex 230™, or Kwik Seal™.

Putty It

Puttying Tips:

- Use any interior solvent-free putty or spackling paste

Sand It

Sanding Tips:

- Use fine 220 grit sandpaper, fine steel wool, or a fine grit sanding sponge.

Paint It

Painting Tips:

- You can use any water based interior paint.
- For long-lasting results, consider using a primer such as Glidden Gripper® which will help your final coat of paint adhere longer.
